

Udaifa K.k

FullStackDeveloper (MERN | TypeScript)

✉ udaifakk509@gmail.com 📞 7306353312 📍 Kannur, Kerala, India 🌐 GitHub 🔗 LinkedIn

Summary

Full Stack Developer with hands-on experience building scalable and production-ready web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) along with modern technologies such as TypeScript and PostgreSQL. Strong expertise in RESTful API development, authentication systems, and responsive UI design. Focused on writing clean, maintainable, and type-safe code while following modern software development practices.

Professional Experience

Full Stack Developer Intern

Zaitoon International Campus | July 2025 – Present

- Built and deployed full-stack web applications using MERN stack with TypeScript integration
- Designed scalable RESTful APIs with structured and maintainable backend architecture
- Developed reusable React components to improve UI consistency and performance
- Implemented secure authentication and authorization using JWT
- Managed database operations using MongoDB and explored PostgreSQL for relational data modeling
- Collaborated with team using Git-based workflows and version control best practices

Education

Higher Secondary Education (+2), NSSHSS Alakode | 2023 – 2025

Skills

Frontend

- React.js
- TypeScript
- JavaScript (ES6+)
- HTML5
- CSS3
- Tailwind CSS
- Bootstrap

Backend

- Node.js
- Express.js
- REST API Development

Database

- MongoDB
- PostgreSQL
- MySQL (Basic)

Tools & Technologies

- Git
- GitHub
- Postman
- Axios
- Visual Studio Code

Core Concepts

- Type-Safe Development
- RESTful API Design
- JWT Authentication
- Role-Based Access Control (RBAC)
- CRUD Operations
- MVC Architecture
- Responsive Web Design

Projects

Shoosifie – E-commerce Web Application, *React.js, Tailwind CSS*

- Developed a responsive e-commerce platform with product listing, filtering, and cart features
- Implemented dynamic routing and optimized UI performance
- Used TypeScript to improve code reliability and maintainability
- Built reusable components using scalable frontend architecture

Live: <https://e-commerce-shoestore-shoosifie.vercel.app/> 

Zafaf – Full Stack Perfume Store, *React.js, Node.js, Express.js, MongoDB*

- Built a full-stack application with authentication and product management features
- Developed REST APIs with structured backend logic and secure data handling
- Implemented JWT-based authentication and role-based authorization
- Designed admin dashboard for managing users and products

Frontend: <https://github.com/udaifa123/Node-Frontend-Project-ZafaF> 

Backend: <https://github.com/udaifa123/Node-Backend-Project-ZafaF> 

Ilham – Hostel Management System, *React.js, Node.js, Express.js, MongoDB*

- Developed a multi-role system supporting Admin, Student, Parent, and Warden
- Built APIs for booking, allocation, and complaint handling
- Designed scalable backend architecture with clean API structure
- Focused on modular design, maintainability, and performance optimization

STRENGTHS

- Problem Solving
- Adaptability
- Quick Learner
- Team Collaboration
- Time Management
